Auto-Ignition Temperature	N/A
Extinguishing media	CO ₂ , extinguishing powder, sand
Special Fire-Fighting Procedures	Wear self-contained breathing apparatus and chemical protection suit.
Unusual fire and explosion hazards	Flammable, vapours can form an explosive mixture with air. In case of fire, CO ₂ and CO may be formed.

Section 6 – Accidental Release Measure

Personal precautions, protective equipment and emergency procedures

Provide adequate ventilation to clear out of hazardous gases. Wear personal protective equipment (see section 8). Remove all ignition sources. Bring people to safety.

Environmental precautions

Avoid substances to get into drains or water.

Methods and materials for containment and cleaning up:

Ventilate the affected area. Thoroughly clean soiled objects and surfaces to the local law and environmental regulations.

Material Safety Data Sheet

According to Regulation (EC) No 1907/2006

Section 7 – Handling and Storage

Handling	Wear personal protective equipment (see section 8). Use only in ventilated areas.
Storage	Avoid mechanical abuse. Storage preferably in cool, dry and ventilated area, which is subject to little temperature change. Storage at room temperature: 10-30°C. Storage at high temperature (above 50°C) should be avoid.
Other Precautions	Flammable, vapours can form an explosive mixture with air. Keep away from sources of ignition - Do not smoke. Heating leads to pressure increase and risk of bursting. Use only in well ventilated areas. Take measures against electrostatic charges. Do not spray against flames or glowing objects. Due to the risk of explosion, prevent vapours from penetrating cellars, sewers and pits.

Section 8 – Exposure Controls/ Personal Protection

Engineering Controls	Keep away from heat and open flame. Store in a cool, dry place.
